

ZhengYou Jin

Full Stack Engineer

Profile

Full-stack developer with 8+ years of experience

- Top skills: **Vue, React, Node**

I have got 8+ years of experience as a full-stack developer.

Love to work with JS frameworks which are the most popular frameworks nowadays.

Worked in many remote teams and companies and completed many web projects using these techs.

I combine my present knowledge and extensive research into your business domain to create a modern professional website that will help you scale your business online by communicating your message to the audience and integrating systems like analytic, real-time customer support, tracking status, etc.

I am looking for a client who cares for quality work.

If this sounds like you, then you can pick me with the assurance of quality and best service.

Always provides professional coding structure, clean code.

Let's work together!
