PROFILE

From a young age, computers have held my interest. I was using Linux, building and repairing computers, and teaching myself C in my teens before I began my college career in computer science at 17.

I'm always fascinated by new challenges, especially when it comes to cutting-edge technologies. I find myself at the intersection between creativity and logic, solving problems with a fresh and multidisciplinary approach.

An avid self-learner, I am constantly working on my own ideas like building applications, automating boring tasks, playing with machine learning, AI, computer vision, AR and discovering the marvels of cyber security.

That's helped me to grow to a tech lead position as a software engineer and to become a full-stack developer with solid knowledge in modern python, and JS such as React and Angular.

Always experimenting, always I learn in g, never bored!

I always go out of my way to deliver the best quality!

SKILLS & EXPERIENCES

- ✓ Python, Django, Flask
- ✓ React.js, Gatsby.js, Next.js, Vue.js, Nuxt.js, Angular.js, Angular 2+
- ✓ HTML5, CSS3, SCSS, jQuery, Bootstrap, Canvas, Metronic UI.

EMPLOYMENT HISTORY

February 2020 - Present

Front-end DEVELOPER

At FreecastInc - Full Time

- Developed and deployed tons of Video Streaming websites by using React, Redux, python, AWS

February 2019 - December 2019

Django/Wagtail Full-Stack DEVELOPER

At Polymerases Company - Part Time

- Developed and deployed tons of CMS websites by using Python, Django, Wagtail, Docker, Circle CI/CD

November 2018 - January 2019

PYTHON SCRAPING & CRAWLER DEVELOPER

At Cambridge Energy Data Lab - Part Time

They asked me to build a lot of scrapers for the big ecommerce platforms and many web automations tools. I developed lots of scrapers/crawlers and web automatic bots by using Python, Selenium web driver, BeautifulSoup, PhantomJS, Cron service.

April 2017 - August 2018

FULL-STACK LARAVEL, DJANGO DEVELOPER

At Eurocom Corporation - Full Time

A Board directors is a recognized group of people who jointly oversee the activities of an organization, which can be either a for-profit business, nonprofit organization, or a government agency. I've worked as full stack Laravel, Django developer. I developed admin dashboard, meeting, documents, voting. permission modules etc

September 2016 - May 2017

React.JS, CSS Expert with Django skills

At Public Sector Pension Investment Board

Originating from research at the University of Cambridge, AI switch is an intelligent program that finds better energy deals for every customer, based on their individual habits. AI switch is designed to remove the hassle in energy switching and works for free to reduce your energy bills.

I was working as frontend developer(React.JS, CSS) for the first 2 months, and then I took over the whole project to improve/maintain the site.

December 2012 - August 2016

SENIOR LARAVEL, DJANGO DEVELOPER

At Pleura Technologies Inc - Full Time

My client asked me to take over an existing codebase, do an audit of the current code and then continue in an ongoing role for optimizing, upgrading, developing. The primary skillsets was PHP, Laravel, python, Django, Postgres as well as strong understanding of APIs(SOAP, REST API, etc). There was also a need for a frontend team to help create an improved user experience across the site
